To copy the files from repository to your computer

There are a couple of possible ways to copy the files from the repository.

1. Run git desktop, you can find it here: <https://desktop.github.com/>
2. Copy the repository as a zip file, download the zip file and unzip it on your local computer.
3. Open the files individually and copy them to your local computer.

It is up to you, to find the best way to do this. The desktop is a simple process for managing github repositories.

Using the Github desktop tool

You might find this video helpful.

The following slides after this one are just showing what the URL might look like for the repo that is created in your class repository when you accepted the invite.

Another Github Desktop tutorial

Here is another video that you might find helpful with github desktop.

Install Github Desktop

Install the github desktop version that will work on your computer. After installation, run the application, you should see the window like the one to the right ->

Welcome to GitHub Desktop

GitHub Desktop is a seamless way to contribute to projects on GitHub and GitHub Enterprise. Sign in below to get started with your existing projects.
